Get the Wider World Working for You
One Platform – Multiple Solutions
Say hello to a Wider World

WideOrbit is the one platform that ties everything together – from programmatic selling with the *Unified Sales Suite*, to digital ad sales with our *Digital Ad Solution*, to simplified cash-in-advance with *WO Payments Suite*. Only WideOrbit takes a Wider-World approach to give you:

- **Broader capabilities to maximize efficiency**
- **Bigger insights to make smarter business decisions**
- **Better connections to streamline workflows between disparate systems**

Media transactions have become increasingly complex, with sales teams juggling disparate systems and inefficiently managing numerous revisions and makegoods. Frustrations like the inability to effectively price across multiple channels, or having limited visibility across demand, can stifle inventory management and revenue growth.

Unified Sales Suite is a set of workflow optimization tools that brings electronic communications from buyers and DSPs to TV stations faster, shortening the negotiating process. At the same time, Unified Sales Suite aggregates and compares multiple demand sources, so stations can efficiently optimize and sell against their available/pending digital and linear inventory.

**Unified Sales Suite allows you to:**

- Automate interactions with buy-side partners to save time and effort
- Improve visibility across demand sources, to ensure acceptance of only the best offers
- Reduce the time required to negotiate and execute campaigns
- Reduce discrepancy rates through system-to-system communication and confirmations

**UNIFIED SALES SUITE IS THE RIGHT CHOICE WHEN YOUR TEAM WANTS TO:**

- Respond faster and easier to urgent avail requests
- Set better-informed pricing based on sell out levels, historical rates, pending demand, and conflict codes
- Reduce the time and effort required to manage makegoods
- Provide timely and actionable insight into airtimes, to give TV appropriate credit for driving results
Each module within *Unified Sales Suite* is designed to solve a specific pain point within the workflow, and each falls into one of two functional categories: sales enablement tools and the demand dashboard. Modules are integrated with *WO Traffic*, and other WideOrbit products, to ensure all inventory demand is viewable and actionable from one place, so proposals are generated faster and electronic orders are expedited.

**Airtimes:** Providing airtimes after spots have aired is critical to providing the buyer with actionable insight into campaign performance, including giving TV credit for driving online traffic. This module provides automated, electronic delivery of airtimes data from *WO Traffic* to buyers, system-to-system, simplifying normalization and reducing errors.

**Marketplace:** By bringing sellers new demand they can evaluate alongside current sold inventory, Marketplace allows sellers to only accept offers that meet their needs. Embracing the digital-style buyer who may not have bought local broadcast TV or radio in the past, Marketplace gives buyers seeking near-to-air inventory easy access to submit offers to hundreds of stations nationwide.

**Sales Console:** The process to request local spot TV inventory, send back avails and pricing, negotiate and tweak details, secure the deal, and, ultimately, provide proof-of-performance reporting, is long, manual, tedious, and riddled with opportunities for human error. Sales Console automates the traditional workflow to increase overall speed and efficiency for the sell side, streamlining the steps involved without compromising control.

**Long Form DR:** Direct Response (DR) advertising requires the consideration of multiple offers, making the management of those offers extremely cumbersome. And with a limited number of slots available, a high preempt rate can result. The Long Form DR module automates and simplifies the management of DR inventory and allocations for *WO Network* cable groups.

**Order Connect:** Sending orders through email and manually re-keying orders causes errors and is extremely time consuming. Order Connect provides a direct connection between buy-side systems, such as Mediaocean and HudsonMX, and *WO Traffic*, allowing sellers to manage orders and makegoods electronically.

Say hello to the leader in media operations, traffic and billing

TV and radio broadcasters are faced with increasingly complex challenges as the media industry continues to evolve. New technologies, platforms, and consumption behaviors present new revenue opportunities even as they make selling media more complicated than ever before.

**WO Traffic** is an end-to-end solution built for the changing local landscape, providing a solid foundation from which stations can manage, execute, and scale ad sales both today and into the future. Even the largest ownership groups can leverage new revenue streams by unifying station operations on a shared technology infrastructure, one that provides a single system of record and that offers integrated solutions to drive efficiencies, reduce costs, and maximize revenue.

**WO Traffic allows you to:**

- Find peace of mind with the stability and reliability of a proven and trusted solution
- Reduce both risks and costs associated with integrating multiple, disparate solutions
- Improve efficiencies by centralizing ad operations across properties, markets, and media types

**WO Traffic is right for your team when:**

- You need a comprehensive solution built by media experts
- High security and stability are critical priorities
- Centralizing ad operations on a single database is important to you
- You want a business partner more than a software vendor
A Solid Foundation

- Centralized operations across properties and media types
- Real-time inventory, revenue and pacing reports
- Advanced log & spot management tools
- Materials and instructions management
- Manage spots & logs with flexible planning and calendar tools
- Extensive integrations with finance and on-air automation systems
- Unified revenue reporting across broadcast and digital properties
- Aging summary report

Continuously Improving with the Latest Updates

- AE profile enhancements
- Close accounting months across properties
- Expanded revenue reporting options to include unprocessed/pending new orders
- Spot details report
- Log Spot Moves – spot history audit
- Placer enhancements to further improve spot placement efficiency

An Extendable Solution to Grow with Your Business

- WO Traffic - Digital Orders
- WO Traffic - Electronic Materials Instructions
- WO Traffic - Multicast
- WO Traffic - GL Export
- WO Traffic - Radio Interchange
- WO Cloud with web-enabled WO Traffic
- WO Analytics
- WO Automation for Radio
- WO Payments Suite
- WO Airtimes
- WO Order Connect
- WO Sales Console

Meet Placer, WO Traffic’s Dynamic Ad Decisioning Engine

WO Traffic’s Placer determines optimal spot placement based on a wide set of variables.
- Provides both horizontal and vertical rotations
- Optimizes spot placement for all advertisers, avoiding unfavorable positions and respecting conflicts
- Replicates and automates manual decisions, empowering users to focus on exceptions
- Customizable logic configurations to best match your business needs and constraints

WO NETWORK

The smarter way to manage sales, commercial operations, and billing, network-wide

With the continuous evolution of content consumption patterns, national broadcast and cable TV networks must adapt their delivery, management, and monetization processes to keep pace. The pressure to maximize diverse revenue streams while addressing operational complexities is greater than ever.

WO Network simplifies every aspect of network ad sales and commercial operations, from proposals and planning, to deal maintenance, stewardship, and billing. With accurate inventory and revenue accounting for all ad types, WO Network is the cornerstone of your growing sales and commercial operations, empowering users to sell with confidence, reduce liability, and improve efficiency by automating and centralizing operations across properties and media types.

WO Network allows you to:

- **Sell with confidence** — Generate faster and more accurate proposals
- **Reduce liability and waste** — Automate placement and evaluate delivery
- **Customize functionality** — Add optional modules to best fit your commercial operations needs

**WO Network is the right choice if your team needs:**

- An intuitive user interface
- A single/combined Order Execution and Commercial Operations system
- Efficient handling of stewardship and deal maintenance
- Reduced ADUs

WIDEBRIT | Say hello to a Wider World®
**Start with the Basics...**

- Inventory and Revenue Management
- Rate Cards, Plans, and Deals
- Program/Format Scheduling
- Extensive Dynamic Reporting
- Constraint Management
- Stewardship and Liability Management
- Support for Standard and Custom Audience Data
- Workflow Deal Approval and Processing Rules

**Then Customize with Optional Modules...**

**Audience Delivery Optimizer (ADO)**
Boost profitability and reduce liability while honoring agency and advertiser restrictions.

- Increase yield: Maximize use of inventory with better unit placement based on projected delivery
- Deliver on deal's impression goals using fewer ADUs
- ADU Prediction Tool: Plan and predict ADU requirements

**Electronic Material Instructions**
Eliminate costly errors often associated with manual data entry. Electronic material instructions allow for direct import of new and revised instructions, with confirmation back to sending systems.

- Import material instructions
- Supports new and revised instructions import
- Eliminates faxes, e-mails, and manual data entry
- Validates for AD-ID correctness

**ADU Offer Tool**
Utilize machine generated algorithms to create ADU offers.

- Auto generate ADU offers en masse, based on selected criteria
- Strategically utilize ADU inventory based on liability reduction goals

**Digital Orders**
Manage digital campaigns alongside linear deals.

**...and Integrations**

**WO Analytics**
Leverage data from multiple systems to analyze business performance, spot inefficiencies, and identify revenue opportunities.

- Establish a single comprehensive source of truth
- Identify new revenue opportunities, analyze and improve business performance

**WO Program**
Manage content across channels and platforms, from production and acquisition through rights, scheduling and transmission.

- Automate content and rights capture and enforcement
- Simplify royalty management and allocations
- Efficiently manage scheduling across network properties
- Gate streaming and on-demand content by time and location

---

“WideOrbit took the time to understand our needs. Entertainment Studios began as an emerging network portfolio with zero systems in place. WideOrbit invested the time and patience to guide us through the implementation, while remaining consistently personable and always readily available to help.”

**Cindy Kelly** Entertainment Studios Networks President Advertising Sales

Digital audio is everywhere – you can be, too

As mobile devices, smart speakers, and connected cars give audiences access to audio content anytime, anywhere, monetizing that content across multiple formats, platforms, and devices becomes increasingly difficult.

*Digital Ad Solution* provides audio content creators with the technical infrastructure to manage, monetize, and measure the reach of streamed and on-demand audio content. As the audio world grows ever wider, our solution makes it simple to optimize revenue, increase listenership, and extend content from linear broadcast to digital listening platforms, allowing you to reach your audience on any device.

**Digital Ad Solution allows you to:**

- Operate efficiently with a single, unified solution to monetize digital content
- Save time by managing digital and linear inventory using the same workflows
- Create additional revenue streams and extend reach by generating new ad inventory

*While we expected to see CPM growth for our digital audio ad inventory, we were pleasantly surprised to see an increase of more than 50%.*

**ERIC GARCIA** Spanish Broadcasting Systems (SBS) GM / Radio Revenue Chief
Operate efficiently with a single, unified solution to monetize digital content

WO STREAMING: Enables publishers to distribute and monetize live audio streams to any device, anywhere. Includes digital order management, ad server, server-side ad insertion (SSAI), dynamic ad insertion (DAI), detailed reporting, audience analytics, rich media players (v7), and royalty reporting.

WO ON DEMAND: Provides podcast and on-demand content creators with infrastructure for managing, monetizing, and measuring their inventory. WO On Demand can be paired with WO Streaming to provide a side-by-side picture of your overall digital audio performance. Includes broadcast-to-podcast, podcast hosting, dynamic server-side ad insertion (DSSAI), ad templates, dynamic RSS engine, reporting engine, and single sign-on support.

WO PROGRAMMATIC DIGITAL AUDIO: Simple and flexible platform to increase digital ad revenue by enabling Real Time Bidding (RTB) and private deal transactions (Deal ID) against live and on-demand audio inventory. Also includes advertiser blacklists, campaign language, category separation, first-price auction, geo-targeting, and dynamic price floors.

Accomplish more without switching between multiple systems

WO AUTOMATION FOR RADIO

Smarter automation to centralize operations across markets, simplifying on-air and remote workflows.

Radio broadcasters are faced with limited budgets and must do more with less. Today’s distributed operations demand a robust, flexible, scalable, and user-friendly automation system to keep listeners engaged around the clock. WO Automation for Radio makes it easy for broadcasters of any size to deliver compelling programming while simplifying workflows and reducing costs.

**WO Automation for Radio allows you to:**

- Reduce operating costs with automated, centralized station operations
- Manage operations remotely, from any device
- Increase efficiency by integrating with other systems you use every day

“WO Automation for Radio integrates seamlessly with our existing infrastructure and has the ability to scale and adapt to our growing needs.”

**JOHN SOLLER** Urban One Vice President of Engineering

**WO AUTOMATION FOR RADIO IS THE RIGHT CHOICE IF YOUR TEAM NEEDS TO:**

- Automate and/or centralize station operations
- Manage content and playlists remotely
- Integrate with other systems, like MusicMaster and WO Traffic
- Leverage talent and content across stations
Radio automation that’s scalable and easily integrated

**Radio Client**
Allows talent in any market to manage your stations in real-time

**Remote Management**
Browser-enabled for access via laptop, or use the native iOS App on your iPhone or iPad

**Multi-Market Voice Tracking**
Record voice tracks remotely to leverage talent across markets

**Audio Finder**
Centralized management of audio libraries from any web browser in your organization

Powerful, in-app widgets to do more — anytime, anywhere

### Stack Control for Real-Time, On-Air Control
- Playlist
- Recording
- Hotkeys

### Audio Library
- Quick Audio Recording & Insertion
- Remote Voice Tracking

**WideOrbit AFR Mobile**
With 24 hours of content airing 365 days a year, radio stations are often caught in a balancing act between timely content, in-station operations, talent availability, and budget constraints.

WideOrbit AFR Mobile is a native iOS app that allows users to control WO Automation for Radio from anywhere, allowing for immediate action based on ever-changing programming needs. Staff can modify programming instantly and on-air talent can control the station during remote broadcasts or sporting events, eliminating the need for a board operator.

**Up-to-the-minute coverage** Immediately respond to local situations, like severe weather, breaking news, and emergencies, to captivate audiences and keep talent engaged with your audience.

**Seamless connectivity anywhere** Reliable access to full station control, instant recording, and on-the-fly voice tracking right from your iPhone or iPad.

**Optimized resources** Eliminate unnecessary in-station costs and unreliable third-party viewing solutions.

Media companies face unique accounting challenges, such as supporting multiple payment types, managing cash-in-advance (CIA) transactions, and navigating complex agency/advertiser relationships. *WO Payments Suite* helps finance teams manage these challenges by optimizing collections best practices, streamlining A/R operations, and improving cash flow.

Building on the workflow efficiencies of WideOrbit’s traffic solution, *WO Payments Suite* is a complete A/R automation platform, purpose-built for the media industry and utilized by nearly 10,000 ad agencies. Automation extends throughout the entire accounting cycle, from full-featured credit card processing, to an intuitive buyer-facing portal, to robust cash application and treasury reconciliation tools.

**Purpose-Built for Media So You Can:**

- Improve cash flow by reducing collections aging and accepting multiple payment types
- Optimize and consolidate workflows by automating manual A/R processes and interacting with buyers on their terms
- Reduce costs and mitigate risk with Level III processing and full PCI-DSS compliance

**WO Payments Suite is Right for You When:**

- Data inconsistencies hinder your ability to collect and reconcile faster
- Your clients are frustrated trying to pay their invoices
- You can’t support prepayments and cash-in-advance transactions
- Manual processes put compliance and audit controls at risk

“The ability to drive growth and expansion through improved efficiency is a competitive advantage.”

** Kent Nate** Bonneville SVP & CFO
Learn more about **WO Payments Suite** today

**EVERYTHING YOU NEED**

- Secure PCI-DSS and Level III credit card portal
- Integrated electronic check (ACH) acceptance
- Cash-in-Advance & order prepayment tools
- Flexible payment plans & convenience fees
- Customizable dunning notices
- Streamlined buyer on-boarding
- Full visibility for sellers & buyers
- Account oversight & reporting flexibility
- Dynamic dashboards with KPIs
- Automated LockBox interface to **WO Traffic**
- Customizable payments rules engine
- Rich audit trail and reporting

**MAKING PAYMENTS EASIER FOR BUYERS, TOO**

- Single login for buyers to manage all payments for all **WO Traffic** seller accounts
- Immediate client data sync with **WO Traffic** ensures the latest orders can be seen by both buyers and sellers
- Self-service order/invoice reprint capabilities
- Near real-time cash application from **WO Traffic** provides up-to-the-minute payment status against CIA orders, so spots get on-air faster

We’ve Partnered with One of the Best

A critical component in timely, accurate, and efficient payment processing is the credit card processor. WideOrbit chose BASYS Processing as our preferred partner for several reasons:

- Seamlessly integrated into the WideOrbit workflow
- >90% customer retention track record
- Dedicated customer care manager for WideOrbit clients
- Focused on the media industry for over 7 years
- Support for Level III-qualifying transaction rates
