- Time code
- Frame count
- Time of day
Digital Asset Management

CORE by 5th Kind centralizes and secures all digital files to improve collaboration, eliminate duplication, simplify access and reduce cost.

CORE provides granular access controls as every piece of metadata can be utilized in defining permissions and roles. As a cloud solution CORE is infinitely scalable, is web-based, and supports most any device with a browser. CORE also has integrated visual and forensic water-marking, combined with a full audit trail of all activity.

Capabilities include:

- Organize
- Search
- Multiple file formats supported
- Review
- Collaboration tools (annotation, group discussion, real-time)
- Granular access control
- Secure distribution
- Approval process
- Support of multiple statuses (legal, creative, other)
- Logging of all activity
